

Name of the Student:

Roll No:

- 1) Define and classify ameloblastoma.
- 2) What is the difference between carcinoma and sarcoma?
- 3) Define and classify oral sub mucous fibrosis.
- 4) Define and classify leukoplakia.
- 5) What are Koilocytes?
- 6) What are Foam cells? Where are they noted?
- 7) What are giant cells? Name some giant cell lesions.

8) What is tzank test?

9) Define Dental Caries. Discuss its etiology.

Page | 2

10) Define and classify cyst?

11) What is papilloma?

12) What is cellulitis?

13) Define nevi. Name the various types of nevi.

14) Write various growth patterns of malignant melanoma.

15) What is xerostomia?

16) Classify salivary gland tumors.

17) What is pulp polyp, pink tooth and periapical granuloma?

18) What is Sjogren's syndrome and mention its types.

19) Name the developmental disturbances affecting tongue?

20) Name the developmental disturbance affecting structure and shape of teeth?

21) What is mesiodense?

22) What is carcinoma in situ?

23) Which is most aggressive cyst?

24) Which cyst is having highest recurrence rate and why?

25) Which is the most common cyst?

26) Syndrome associated with OKC?

27) What is Gardner's syndrome?

28) Which two salivary gland tumors that show perineural invasion?

29) Name the salivary gland tumor having bilateral occurrence?

30) What is bay cyst?

31) What is primordial cyst?

32) Classify Vesiculobullous lesions.

33) What is difference between pemphigus and pemphigoid?

34) What are macule, papule, vesicle and bulla?

35) What is haemangioma? Discuss its types and associated syndrome.

36) Discuss verrucous carcinoma as misnomer.

37) Write the histopathology of warthin's tumor?

38) Synonym for Pindborg's tumor.

39) Where do you see Rosette pattern?

40) Where do you see cribriform pattern?

41) What are ghost cells?

42) Name some ulcerative lesions of oral cavity?

43) Define premalignant lesions and conditions.

44) Differentiate and Classify benign and malignant tumors?

45) What are genodermatoses? Enumerate them.

46) What is squamous cell carcinoma?

47) Name some tumor arising from bone, nervous tissue and muscle tissue?

48) What is hairy tongue?

49) What is cherrubism?

50) What is lichen planus?

51) Where did you see target lesions/bull's eye lesions?

52) What is Bull Tooth?

53) What is talon's cusp?

54) What are fusion, gemination and concrescence?

55) Describe the histopathology of odontogenic keratocyst?

56) What are pyogenic granuloma and pregnancy tumor?

57) Where did you see arcading pattern?

58) Which lesion is called as self-healing carcinoma?

59) What is Bone scar?

60) What is Osteomyelitis? Classify them.

61) What is cellulitis?

62) What is sialolith?

63) Excess salivation is called as.....

64) What is mucocele?

65) What is keratin pearl? Where did you see it?

66) What is fibrosarcoma?

67) What is osteosarcoma?

68) Histopathology of enamel caries?

69) Describe the histopathological grading of OSCC?

70) Difference between Osteoma, Osteoid osteoma, osteoblastoma?

71) What is hamartoma? Classify them.

72) What do you mean by fibro-osseous lesions? Classify fibro-osseous lesions.

73) What are cholesterol clefts?

74) Where do you see Lies gang Rings?

75) Describe the histopathology of pleomorphic adenoma?

76) Which is the most common salivary gland tumor?

77) What is ABCDE check list in case of melanoma?

78) Where do you see cherry blossom or branchless fruit laden tree appearance under radiograph?

79) What are epi-myoeptithelial islands? And seen in which condition.

80) What are corps, ronds and grains?

81) Crocodile tears are seen in which condition?

82) What is myasthenia gravis?

83) What is "CREST" syndrome?

84) What is Nikolsky's sign? Where is it positive?

85) What is TNM and STNMP Staging system?

86)
